DESIGN OUTSIDE THE SQUARE

trimatrix®

The Dulux Trimatrix® System offers unprecedented design freedom on engineered timber products such as MDF board. No longer is the designer compelled to adopt straight lines, sharp edges, conventional colours or flat surfaces.

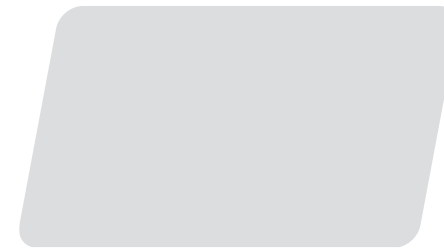

Whilst traditional methods for finishing MDF board have typically been expensive and labour intensive process, Dulux Trimatrix® opens the door to unlimited design opportunities with respect to MDF board, at an affordable price.

Dulux Trimatrix® permits designers to create smooth round corners, soft bevelled edges, decorative or functional port holes and openings. Whether it's furniture, commercial interiors, shop displays or fittings, kitchen cabinets or some other application for MDF board, Trimatrix® is leading edge powder coating technology, exclusively available from Dulux.

Powder coating is an environmentally friendly finish with a long history of proven performance. Powder coating is essentially "paint without liquid". There's little, if any, volatile organic compounds which means no solvents, no water and no sludge to manage. Processing efficiencies are a major advantage for powder coating – over 95% of powder can be utilised, whilst the product can be handled almost immediately after coating.

Powder coating surfaces are often exposed to high operating temperatures, high impact or high chemical environments. The attractive, robust finishes that you are used to seeing on your metal windows, doors and furniture are generally powder coated!

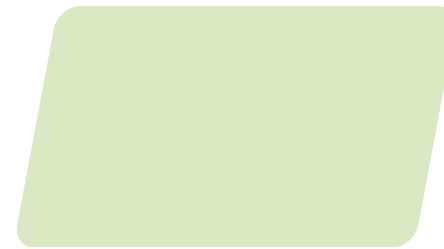

## COLOUR RANGE

**Metropolis® Silver Pearl**  
942 89128 Matt

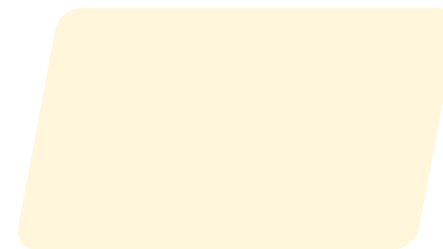

**White Out™**  
942 89093 Texture

**Intensity™ Mist**  
942 89103 Matt

**Raw Silver™**  
942 88979 Texture

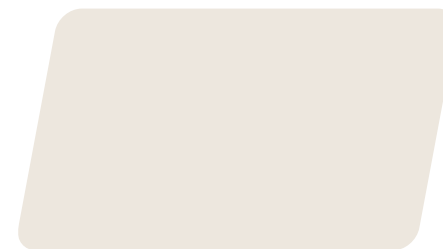

**Divine™ Cream**  
942 89130 Texture

**Intensity™ Citrus**  
942 89118 Matt

**Precious® Silver Pearl**  
942 89214 Matt

**Divine™ Latte**  
942 89097 Texture

**Intensity™ Blues**  
942 89125 Matt

**Revolver™ Blue Pearl**  
942 89137 Texture

**Divine™ Mocha**  
942 89112 Texture

**Intensity™ Violet**  
942 89107 Matt

**Revolver™ Graphite Pearl**  
942 89122 Texture

**Divine™ Chocolate**  
942 89134 Matt

**Intensity™ Cherry**  
942 89115 Matt

**Pitch Black™**  
942 89138 Texture

The choice of colours and effects is enormous with the Dulux Trimatrix® System. Dulux is proud to launch a range of stock colours of Trimatrix® powder coatings as shown in this brochure. Virtually any colour can be specifically prepared by Dulux, including pearl and/or textured effects. So with design freedom comes individual choice of colour and effect.

The Dulux Trimatrix® System is not a conventional powder coating, so it is only available through Dulux Registered Applicators for Heat Sensitive Substrates. This ensures that the finished product meets many international standards for MDF substrates such as the DIN 68930 "Standard For Laminated Surfaces" and AS/NZS 4266 "Reconstituted Wood Based Panels - Methods of Test".

Many grades of MDF board have been powder coated and tested with Dulux Trimatrix®, and most boards provide a good surface for coating. For outstanding results, Dulux recommend Trimatrix® MDF Board in conjunction with the Trimatrix® Powder Coat. The Trimatrix® MDF Board has been developed by Dulux (a division of Orica Australia), the Orica Chemicals Division and a leading MDF board producer, to provide an exceptional finish for a wide range of applications and environments. A listing of Dulux Registered Applicators for Trimatrix®, performance test results and / or details about the Trimatrix® board are available on our web site – [www.trimatrix.com](http://www.trimatrix.com)

Imagine, with Dulux Trimatrix®

- Seamless edges without the need for strips or corner joints
- Decorative or functional ports or cut outs fully coated
- Contoured finishes such as bevelled edges
- Extensive colour choice and freedom
